Siemens Gamesa - SG Training Web

HSE-4160

Setting to Work (ENG, DK, CN, FR, DE, PT, ES)

Purpose

The purpose of this e-Learning is to provide employees with an awareness of the Setting to Work Procedure (PRO 106614).

The Procedure provides all Siemens Gamesa Renewable Energy sites, projects, and locations with a standardized framework to ensure work tasks are executed in line with Health, Safety & Environment (HSE) requirements. It also defines behavioral attributes that are necessary for driving a positive HSE culture, supporting the successful implementation of a Setting to Work process.

Who should attend?

Employees who are actively involved in planning, preparing or undertaking physical work on behalf of SGRE. This includes, but is not limited to the following roles: Site Leads, Foreman, Production Workers, Technicians, HSE Advisors.

Objectives

Acknowledge the importance of the global Setting to Work procedure implemented within SGRE

Recall the terminology and key process steps identified within the Setting to Work procedure

Understand how the Setting to work procedure & associated tool kit can be applied in your everyday work

Contents

This course will provide you with:
- An overview of why Setting to Work is important
- A breakdown of the requirements/tool kit contained within the Setting to Work Procedure
- Information relating to key roles & responsibilities associated with the Procedure
