Technical Product Training Suzlon Technology Platform

Purpose

The overall purpose of the course is to qualify field service technicians in the scheduled maintenance of the Suzlon platform.

Who should attend?

The course is intended for all technicians that will be performing scheduled maintenance on Suzlon turbines.

Objectives

Upon completion of the course the participants are able to:

- Apply knowledge of turbine systems and Siemens Gamesa Renewable Energy technical documentation to perform scheduled maintenance.
- Explain technical and safety guidelines
- Practice scheduled maintenance to build practical competence in the field.
