GWO BST Working at Heights Refresher

Purpose

The purpose of this course is to review and build on previously gained knowledge, skills and abilities through practical training so participants can use basic personal protective equipment, work safely at height and perform safe and comprehensive basic rescue from height in a wind turbine environment.

Who should attend?

The course is intended for personnel who will work in the wind industry or related fields and have duties in a wind turbine environment.
It applies to personnel whose employer or workplace duty holder has identified exposure to fall hazards, ladder climbing, evacuation, rescue or work with personal fall protective equipment.

Objectives

After having successfully completed this course, the participant can:
- Act independently and safely when using basic personal protective equipment, Working at Height techniques, and performing comprehensive basic rescue from heights in a remote wind turbine environment.

Prerequisites
