

Siemens Gamesa - SG Training Web

OF-4017

Work Controller

Purpose

1. To give a candidate a clear understanding of the Safe system of work (SSW)
- 2: To give a candidate a clear understanding of their responsibilities within the SSW
3. To clarify the Work Controller role remit and parameters

Who should attend?

SGRE and 3rd party Installation leads, pre-assembly foreman etc

The role is in managing the safe system of work on project and so management experience is essential.

Objectives

This course is used as a control measure and pre-requisite in authorizing people to work in the role of Work Controller (WC) on offshore wind projects.

Upon successful completion of the training, passing of the accompanying test, and in alignment with the PWTCF/role requirements a candidate is able to accept a WC role on SGRE sites.

Prerequisites

[Training in use of Personal LOTO \(OF-4011\)](#)

Contents

1. Role description
2. Role remit
3. Role parameters
4. Detailed description of the SSW for Hazardous energy (LV)
5. Descriptions of processes, documentation and the day to day management of the SSW on site
